

IMET 2000 PAL

International Medical Education Trust - Palestine

The International Development Programme of Family Medicine in Palestine (IDFMP)

Dr. Samar Musmar

Professor Paul Wallace

Aims

To contribute to the establishment of Family Medicine in Palestine by providing a range of opportunities for Palestinian residents to engage with family medicine practitioners and teachers and from other countries

IMET 2000 PAL
International Medical Education Trust – Palestine

Overall objectives of the programme

- ▶ To provide solidarity
- ▶ To relieve isolation
- ▶ To enable Palestinian family physicians and residents in training to show their successes outside Palestine
- ▶ To share approaches and solutions

Components of the IDFMP

- ▶ International Course for Palestinian family medicine residents
- ▶ Opportunities for experienced FM practitioners and teachers from other countries to provide individual training and mentorship to Palestinian FM residents
- ▶ Opportunities for Palestinian FM residents to attend international conferences
- ▶ International exchange programmes for students and residents
- ▶ International academic fellowships to enable selected Palestinian family physicians to develop academic skills in an International setting
