These workshops were led by Mr.Ahmad Hudrob (American Heart Association “AHA”) Instructor.

June 23rd, 2019

June 30th, 2019

IMET2000-Pal signed up a memorandum of understanding with Jasmine Society

Representative of IMET2000-Pal Mr Fadi Zaben, the Chairman of Jasmine Charitable Society Mr Omar Amin, signed up a memorandum of understanding for future collaboration. The parties are looking forward to working together towards empowering Jasmine Charitable Society members of staff with training courses to deal with children with learning difficulties. On the other hand, IMET2000 will be supporting twenty children in their treatment for one year.

◆ **Critical Care Nurse Training: Advanced ECG Interpretation Workshop .**

June 27th, 2019; IMET2000-PAL in cooperation with An-Najah National University Hospital and Ministry of Health organised the Critical Care Nurse Training: Advanced Electrocardiogram (ECG) Interpretation. The workshop was attended by more than 32 nurses from the governmental hospitals and An-Najah National University Hospital at Nablus. This workshop was led by Mr. Awni Yahya, RN, BSN-Clinical Critical Instructor.

◆ Art Therapy for Kids with Cancer

IMET2000-PAL in cooperation with An-Najah National University Hospital organized three activities in art therapy this month for children with cancer. The first activity on the 16 of June , 2019 was for children with cancer and chronic diseases. This unique program provides children with a safe space to heal and gives them a voice to express and share stories. On 23 of the same month a second activity was held. And on 30th of June the third activity. It included a free drawing by watercolour, which each child can choose his/her own colour and that will reflect his/her feelings. In addition, the children's passion to play and draw was obvious in colours world. In these sessions, we used art therapy to help those children and their families explore and express difficult thoughts and feeling. In this program, we are hoping to help these children cope with some of the cancer symptoms and its treatment. The workshops included a therapeutic story to develop children's imagination and perception and a drawing diagnostic test and scratch drawing.

These activities help the children with cancer to express buried emotions, give a feeling of self-confidence and freedom, and it helps cope with grief, fear, anxiety and depression. Approximately 9 children attended each activity. Ms. Hadeel Alawneh, art therapist, led the activities.

“ Donation Helps Disabled Children in Sanad Society Experience a New Sensory World”

The sensory room, donated by International Medical Education Trust (IMET2000), is a facility that provides a full range of sensory stimulation in an atmosphere of comfort and relaxation. Sanad Society helps and supports almost 200 disabled children with complex disabilities, both physical and learning difficulties. The sensory room filled with soft furnishings and a range of audio-visual equipment including fibre optic lights, a sound system etc. The room creates a relaxation area for the children whilst allowing them to make choices, and enjoy new experiences.
