IMET2000 Renews Support for Children with Special Needs from the Early Intervention Charitable Society

IMET2000 supports the Early Intervention Charitable Society (EICS) in Beit Awar, Ramallah for the third consecutive year to cover the treatment expenses of another 20 Palestinian children for 2023 to help EICS with their mission of looking after kids with learning disabilities and mental disorders. EICS is a charity that provides rehabilitation services for children with disabilities from 18 villages in the Ramallah district; mostly from poor families who cannot pay for their kids' treatment. Their services include early detection of disabilities, physical therapy, occupational therapy and speech therapy, all essential for integrating this disadvantaged group of children into society. Our CEO stated that IMET2000 is very keen to support the efforts of EICS to deliver its current objectives and become a sustainable service.

We hope to continue working with EICS and other similar charities such as Jasmine and Al Riyadh to provide access to as many kids with physical and mental disabilities as we can regardless of their financial status.

IMET2000 Organised Two Basic Life Support Training Workshops this April

IMET2000 in cooperation with the Arab American University (AAUP) and An-Najah National University (NNU) organised Two training workshops attended by 18 doctors, nurses and interns from governmental and private hospitals on:

Critical Core Training: Basic Life Support (BLS) training for Healthcare Professionals

The workshops took place at IMET2000-Pal Training Centre at Ramallah and An-Najah Life Support Centre. This training aimed to provide instructions and practical sessions about Cardiopulmonary Resuscitation (CPR) for healthcare professionals, Automated External Defibrillation (AED) and First Aid. They were led by certified instructors from American Heart Association(AHA).

IMET2000 Organised a First Aid Workshop for Therapy Specialists at Jasmine Society

April 29th, 2023, IMET2000 organised a first aid training workshop in collaboration with the Jasmin Charitable Society in Ramallah. The aim of this workshop was to enhance the knowledge of therapeutic specialists on administering first aid to children in emergency and critical situations. The workshop was led by Dr Motaz Draghma, the Medical Education Officer at IMET2000-Pal, and covered several aspects, including raising awareness about medical emergencies that children may experience, how to handle choking incidents, first aid for fainting and bleeding, and steps for cardiac resuscitation.

These workshops fall under the framework of life-saving training provided by IMET2000, which targets a group of children in urgent need of increasing the expertise of medical crews and educating them about critical situations that may lead to complications. The director of the Jasmin Charitable Society, Mrs Wafa Al Shaikh, thanked IMET2000 for their dedicated and continuous support in increasing community health awareness. She looks forward to more educational workshops that have a significant impact on increasing health knowledge and awareness in the community.

IMET2000 Granted Mr Fadi Esleem from Gaza to Complete his PhD in Nursing

IMET2000 sponsored Mr Fadi Esleem with a travel bursary to complete his PhD in the Faculty of Nursing at the International Islamic University Malaysia.

This is what Mr Fadi had to say:

Dear respected in IMET2000

I am writing to you to thank you for all the support that you have given me during my travels to Malaysia. You have shown a high level of support and encouragement towards me. Therefore, I was able to travel and complete my university studies at International Islamic University Malaysia and benefit in the best possible way.

This grant came to relieve me of the burden of travelling costs and focus more on my studying.

Travelling was only possible with the unlimited emotional and financial support of IMET2000.

I will not forget what you did for me, thank you very much, wishing you all the best,

Sincerely,
Fadi Esleem
